

Adilene Garibay

Dallas, TX | adilenegaribay2@gmail.com | GitHub: https://adilenegaribay.github.io/knowledge_mining/

PROFESSIONAL SUMMARY

Data-driven professional with experience in clinical research coordination, statistical analysis, and student success support. Currently pursuing a Master's in Social Data Analysis, with hands-on training in R, data visualization, AI-assisted research, and knowledge mining. Skilled in collecting, cleaning, and interpreting both quantitative and qualitative data to inform evidence-based decisions. Experienced collaborating across academic and institutional settings with a commitment to equitable student outcomes and continuous improvement.

EDUCATION

Master of Social Data Analysis and Research | The University of Texas at Dallas | 2025 – Ongoing

Relevant Coursework:

- **Methods of Data Collection and Production:** Comprehensive framework for data generation and collection in the big data age. Covers survey design, interviews, experiments, web scraping, and social media data. Programming in R. Projects available on GitHub.
- **Data Visualization:** Principles and best practices of visual data analytics and data literacy. Covers chart design, animated data, and interactive content generation. Programming in R. Projects available on GitHub.
- **Introduction to Quantitative Methods:** Graduate-level statistics covering descriptive statistics, probability, hypothesis testing (t-tests, chi-square, ANOVA), confidence intervals, and an introduction to regression analysis. Computer-supported data analysis.
- **Knowledge Mining:** Interdisciplinary course integrating data mining, machine learning, and AI — including large language models (LLMs), Retrieval-Augmented Generation (RAG), and agentic AI workflows. Emphasizes responsible AI use, effective prompting, and AI-human collaboration for research and knowledge discovery. Programming in R.

Bachelor of Political Science | University of North Texas at Dallas | May 2024

PROFESSIONAL EXPERIENCE

Legal Assistant | Garza Legal Group LLC | November 2025 – Present

- Led transition of firm from internal server to a new client/legal software system, managing data migration and building a structured filing system for the entire firm
- Designed and implemented a comprehensive data tracking system for client documents, invoices, payables, missing payments, and last client activity and communication
- Collected and consolidated data from multiple software platforms to produce a clean, unified view of client status, financial gaps, and next steps for the attorney
- Built Excel workbooks with pivot tables to surface missing financials and outstanding items, enabling data-informed decision-making for firm leadership
- Retrieved and organized data from county clerk portals, compiling client folders for attorney review
- Maintained clear communication with attorney and paralegal to ensure team alignment and operational efficiency

Clinical Research Coordinator – Nuclear Medicine | Dallas VA Medical Center | June 2024 – November 2025

- Coordinate clinical trials ensuring strict regulatory compliance with FDA and VA research standards, demonstrating strong project and process management skills
- Manage and maintain patient data, consent documentation, and IRB records — applying FERPA-adjacent data privacy and compliance practices
- Collect, organize, and report data in support of institutional research goals, producing accurate metrics for external reporting
- Collaborate cross-functionally with physicians and research staff to ensure protocol adherence and continuous improvement
- Maintain ongoing communication with patients regarding appointments and clinical assessments

Writing & Statistics Tutor | UNT Dallas Learning Commons | Aug 2023 – May 2024

- Provided individualized tutoring in academic writing, Criminal Justice coursework, and statistics, supporting a diverse student population across skill levels
- Facilitated SPSS workshops, guiding students through data cleaning, statistical analysis, and interpretation of results for course assignments
- Collaborated directly with faculty mentor Dr. Aaron Bartula to align tutoring support with course expectations, ensuring students received clear guidance on assignment requirements for his Criminal Justice and Statistics courses
- Served as a communication bridge between students and faculty, clarifying assignment instructions and translating academic expectations into actionable support
- Reinforced data literacy and analytical thinking skills in students, contributing to improved academic outcomes in statistics-heavy coursework

RESEARCH & ACADEMIC PROGRAMS

McNair Scholar | UNT Dallas | *Dec 2022 – May 2024*

- Conducted original research on Human Capital Theory & Hispanic Educational Attainment — performing literature review, database research, and data cleaning and analysis using SPSS (t-tests, multiple regression, multivariate analysis)
- Presented research findings and policy implications to an academic audience, translating complex data insights into accessible, actionable recommendations
- Collaborated with multiple faculty mentors throughout the program, developing academic research skills, public presentation, and professional resilience
- Participated in career development workshops led by Ms. Polk, gaining hands-on exposure to UNT Dallas career resources including Handshake to identify internship and employment opportunities
- Provided peer mentorship (Jul 2023) to incoming McNair Scholars, guiding them through research development and program navigation

TECHNICAL SKILLS & COMPETENCIES

Statistical & Data Analysis: SPSS, R — data cleaning, t-tests, regression (multiple/logistic), partial correlation, multivariate analysis

Data Visualization & Reporting: R (ggplot2 and interactive content), data storytelling, visual analytics

AI & Emerging Technologies: Responsible AI use, prompt engineering, LLMs, RAG architectures, AI-assisted research workflows, GitHub

Research & Assessment: IRB documentation, program evaluation, APA 7 writing, peer-reviewed article critique

Professional Skills: Communication, collaboration, adaptability, critical thinking, public speaking, project management

LEADERSHIP & AFFILIATIONS

Pre-Law Society Secretary | UT Dallas | *Apr 2023*

- Served as Secretary under faculty advisors Sharon and Ed Fjordbak, collaborating closely with them to plan and execute society events and initiatives
- Coordinated with other universities to bring guest speakers — including practicing attorneys and law students — to the UNT Dallas campus, expanding professional exposure for members
- Assisted in fundraising efforts to support society programming and events
- Hosted workshops on law school applications, professional writing, and resume-building to prepare students for postgraduate opportunities
